THE NEW STANDARD IN SCAFFOLD PLANK

Why Customers Choose NexgenPlank

NexgenPlank helps construction workers have a safe, reliable, and easy-to-use planking system. Our lighter scaffold plank option makes it easier and quicker to install, increasing productivity on the job site. Because of the inherited traits of fiberglass, our planks will not rust or corrode and provide longer use. NexgenPlank is the perfect solution for contractors looking to save costs, improve productivity in the field, and provide a safer working environment.

Safer. Lighter. Stronger.

According to OSHA, **planking** is the single most critical component of any scaffold.

Increased Productivity & Efficiency

- Lightweight - easy handling and faster erecting
- Easy-to-assemble
- Compatible with existing scaffold

Cost-Effective & Long Lasting

- Maintains structural integrity
- Reduced maintenance and replacement
- Transporting is easier, faster, and cheaper
- Lower storage cost

Exceeds OSHA & ANSI Safety Standards

- No overlapping planks (reduces trip hazards)
- Non-skid surface
- Lightweight - reduces injuries

Customized Fiberglass Pultrusions

- Custom length planks to accommodate any span
- Custom company identification - color, name, logo, contact information
- Custom identification reduces theft on job sites
